Summary

Final-year IT student passionate about front-end development with experience building responsive websites using HTML, CSS, and JavaScript. Skilled in React.js and UI/UX design with a strong foundation in cross-browser testing and responsive design.

Education

Patan College for Professional Studies

BSc. (hons) Computer Science and Software Engineering: *Final year (ongoing)*

Skills

Technical Skills	UI/UX Design, Responsive Web Design, Web Development, Manual Testing (Functional, Usability), Cross-Browser Testing
Programming	JavaScript, HTML, CSS, React.js, Flutter, Java, Python, SQL
Tools and Platforms	GitHub, ClickUp, Figma, MongoDB, Postman, MS Office, Google Workspace
Soft Skills	Detail-oriented, Quick Learner, Quality-focused, Analytical Thinking, Strong Communication, Team Player, Time Management, Problem-Solving

Projects

- **Hotel Booking and Management System (Java)**

Designed a hotel booking system with form input handling and validation. Focused on user interaction logic and tested for usability.

- **Taxi Booking System (Python)**

Created a functional taxi booking system with edge case handling and basic UI testing to ensure user input consistency.

- **To-Do List Web Application (React.js)**

Built a dynamic, responsive to-do list application using HTML, CSS, JavaScript, and React.js. Focused on clean UI, task interactivity, and mobile-first design. Manually tested responsiveness and UI behavior across devices.

- **Mobile Application (Flutter)**

Developed a cross-platform mobile application, offering a responsive and feature-rich experience for users. Performed basic mobile testing on Android; checked layout consistency and feature usability.
